Rear: 9mm

Tyres

Front: GRP S3

Rear: GRP S1

Gears

Spur: 40

Pinion: 24

As with all set ups these are only a guide & a good starting point as this worked on a warm day at Brookland track with medium grip. So for those who have no idea where to start this might help. But as with all set ups different tracks, temperatures, types of tarmac, different driving styles all contribute to requiring different set ups. Good luck & look forward to seeing you at a track soon.
